

Better and better

The aim of the Valmorel ski area is to **improve the area** and satisfy its customers.

To this end, the ski area annually invests in **new equipment**.

Since 2018, different structures have been **rejuvenated** to provide easier access to the slopes and better snow conditions.

The pèles cord lift

Snowboarders will be happier this year, as access to the Riondet sector is now easier thanks to **the Pèles cord lift**.

300m long, it permits everyone to access, with ease, **the freeride area** at the bottom of the rugged Cheval Noir.

Digital hub

The Crève-Coeur sector will have a **new digital hub** with an express purchase point where customers can buy or reload their ski passes using one of the 2 automatic machines.

They will be able to benefit from this service over extended time slots. Hostesses will always be available for customers who want advice via a **completely renovated “purchase point advice” corner**.

Snow cover extension

Several projects have recently been undertaken on the ski area concerning snow cover :

- * An extension of the cultured snow network on the Mottet piste, over more than 1.2km.
- * Optimisation of the La Combe de Beaudin cultured snow network and replacement of old bi-fluid snow-makers with recent technology equipment.
- * Installation of fans at the arrival of the Altispace and at the intersection of the Combe de Beaudin and on the piste returning to Valmorel via the Roset chairlift.
