

We love green

Valmorel has been fighting the ecological cause for several years. The ski area and the Tourist Office work together to preserve the environment and both small gestures and large investments continue to be made.

20 M³
of waste

4 dry
toilets

11 000
Tumego
ashtrays

- * Distribution of «**Simple gestures for an ecological holiday**» flyers.
- * The **Valmobuses**, which serve the villages and the station to reduce car traffic, are «**Euro6**» buses with filters that run with **Adblue** and only consume 0.287 kilos of CO2 per passenger transported.
- * Provision of pocket «**tumego**» **ashtrays** at the bottom of the ski lifts.
- * Ski passes are **reusable** thanks to the refundable deposits.
- * **4 dry toilets** on the ski area.
- * Distribution of Kraft paper bags for **rubbish sorting**.
- * **Separating rubbish bins** throughout the resort and awareness notices. No more bins on the ski area to encourage skiers to take their rubbish back down to the resort and sort it out when throwing it away.
- * Optimisation of the La Combe de Beaudin **cultured snow** network and replacement of old bi-fluid snow guns with new technology equipment, ten times **less energy-hungry** and capable of producing quality snow.
- * **Biodegradable or cardboard glasses** distributed during the resort events throughout the various sites of the territory (Transparent cups in PLA (polylactic acid), biodegradable material and compostable or cardboard).
- * 1 day is dedicated to **cleaning the pistes**, with the presence of the valley schoolchildren every other year. The estimated amount of waste collected is approximately **20 m³**.
- * To avoid travelling by car, there are shuttle buses every morning and evening during the French school holidays, going through all the villages **from Feissons-sur-Isère to Valmorel** to allow residents and holiday-makers to go skiing easily and with a **lower carbon footprint**.
